2wks ago - Ninja Partners LLC is hiring a remote Software QA Tester. 💸 Salary: unspecified 📍 Location: Philippines

## Role Description

This is a full-time role responsible for ensuring the quality and usability of products across web, mobile, and API platforms. The position requires a mix of exploratory testing, automated test development, and collaboration with Product, Engineering, and Support teams.

What does a day in the life as a Software QA Tester (Automation Testing) look like?

- Develop, execute, and maintain test plans, test cases, and regression test suites.
- Perform exploratory, functional, regression, integration, and API testing across products and services.
- Identify, document, prioritize, and track defects through resolution.
- Collaborate with Product Managers and Developers during requirement refinement, sprint planning, and release validation.
- Contribute to automated testing initiatives and help improve overall test coverage.
- Validate software behavior across multiple browsers, devices, and environments.

processes.

- Experience testing modern web applications, APIs, and integrated systems.
- Familiarity with test automation frameworks and automated regression testing concepts.
- Working knowledge of tools such as Jira, GitHub/GitLab, Postman, browser developer tools, and SQL.
- Understanding of HTTP requests, REST APIs, and client/server application behavior.
- Ability to investigate issues, reproduce bugs, and clearly communicate findings to technical and non-technical stakeholders.
- Strong organizational skills and attention to detail.
- Comfortable working both independently and collaboratively in an Agile development environment.
- Curiosity, critical thinking, and a proactive approach to improving product quality.

## Requirements

- Experience with automated UI testing tools such as Playwright, Cypress, or Selenium.
- Experience validating payment flows, transactional systems, or third-party integrations.
- Familiarity with CI/CD pipelines and automated deployment environments.

## Benefits

- Full-time employees.
- Remote setup.
- Competitive compensation.
- Adherence to government-mandated benefits.
- Retirement Savings Program with Company Matching.
- Life Insurance.
- HMO on day 1.
- Paid time off, birthday leave.
- Bonus and incentive plans.
- Opportunities for skills training and personal and professional development.
- Employee Referral Program.
