MY NEXT MOVE

# Web Developers

**Also called:** Web Architect, Web Design Specialist, Web Developer, Webmaster

**What they do:**
Develop and implement websites, web applications, application databases, and interactive web interfaces. Evaluate code to ensure that it is properly structured, meets industry standards, and is compatible with browsers and devices. Optimize website performance, scalability, and server-side code and processes. May develop website infrastructure and integrate websites with other computer applications.

**On the job, you would:**
- Write supporting code for Web applications or Web sites.
- Design, build, or maintain Web sites, using authoring or scripting languages, content creation tools, management tools, and digital media.
- Back up files from Web sites to local directories for instant recovery in case of problems.

## KNOWLEDGE

### Engineering and Technology
